Portfolio: parbro240.github.io/engineering-portfolio

EDUCATION

Oklahoma State University, Stillwater, OK

Expected May 2028

Bachelor of Science, Mechanical and Aerospace Engineering | Minor in Mathematics

GPA 4.00

ENGINEERING EXPERIENCE

Advanced Manufacturing Engineering Intern

May 2026 - Aug 2026

Peterbilt Motors Company, Denton, TX

- Supported the Chassis Powertrain and Cab & Outer Body groups on advanced manufacturing engineering projects, collaborating with engineers across plant functions.
- Created and modified 3D models in Creo to support active manufacturing engineering projects in a production environment.
- Developed an AI-assisted tool that reduced engineering drawing information retrieval from approximately 5 minutes to 1 minute per drawing.
- Managed multiple project workstreams and presented progress weekly, concluding with a final presentation to engineering leadership.

RESEARCH & ENGINEERING PROJECTS

Undergraduate Researcher - Putter Face Materials & Surface Finishes

Sep 2026 - Present

Oklahoma State University | Faculty Sponsor: Dr. Mike Xiang

- Investigating how putter-face materials and surface finishes influence ball bounce, skid, spin, and the transition to true roll after impact.
- Developing a repeatable test method using controlled putter impacts, marked golf balls, and high-speed video to quantify post-impact ball motion.

Custom Golf Putter Design & Prototyping

Personal Project

SolidWorks | Additive Manufacturing | Rapid Prototyping

- Designed and iterated multiple custom mallet putter prototypes in SolidWorks, evaluating head geometry, mass distribution, assembly, and manufacturability.
- Built physical prototypes with additive manufacturing and a modular screw-on face to accelerate design iteration and component testing.
- Applied DFA/DFM principles using heat-set inserts, threaded fasteners, and printable geometries for repeated assembly and testing.

ADDITIONAL EXPERIENCE

Mover / Navigator

May 2025 - Aug 2025

Little Guys Movers

- Promoted to Navigator within two weeks; planned truck layouts and coordinated with team members and customers to complete moves safely and on schedule.

LEADERSHIP & ACTIVITIES

Cowboy Golf Club - Founder & President (University Approval in Progress)

Aug 2026 - Present

- Leading development of a proposed Oklahoma State University student organization and coordinating registration, membership structure, and club operations with the CSO.

Cowboy Rocketworks - Member

Jan 2026 - Present

Oklahoma State University Bands – Marching, University, Jazz Ensemble

Aug 2024 - May 2026

TECHNICAL SKILLS

CAD: SolidWorks (Certified SolidWorks Associate - CSWA), Creo Parametric (assemblies, drawings)

Manufacturing: Additive manufacturing, 3D printing, rapid prototyping, Design for Assembly (DFA), Design for Manufacturability (DFM)

Fabrication Training: manual lathe & mill, MIG welding, sheet metal fabrication, laser cutting / engraving

Programming & Tools: Python, Microsoft Excel, PowerPoint, Word
